

## **MKS releases Auto Biller Plus, a Cost Effective Billing and Service Solution for Alarm Dealers**

MKS releases a cost effective, entry level product to their Millennium Management Software Series. Auto Biller Plus will offer alarm dealers a way to take advantage of the benefits of MKS' Accounts Receivable and Service Tracking modules at a very affordable price. "While our Millennium Management product is fully scalable for both large and smaller alarm dealer businesses, we wanted to offer a more cost effective option for dealers who are just starting out or who simply want to experience what we offer at MKS without a huge financial investment. Auto Biller Plus has the power of software programs that cost twice as much and we are confident that you start seeing an ROI on your investment in less than 30 days" commented MKS President, Victoria Ferro.
